SUMMARY

IT student with hands-on experience in technical support, networking, surveillance systems, and IoT development. Skilled in hardware troubleshooting, NVR/IP camera setup, fiber infrastructure, and embedded systems using ESP8266. Built an IoT-based automatic pet feeder with Django web integration.

TECHNICAL SKILLS

INTERNSHIP EXPERIENCE

Technical Support Intern
Technical Support Department
March 2026 – June 2026
Unit 7-E No. 7A Ford Ave. St., Pamplona Tres, Las Piñas City, Metro Manila

- Assisted in assembling and installing network infrastructure equipment including Optical Distribution Frame (ODF), Network Video Recorder (NVR), Decoders, Media Converter Rack, and Media Converters.
- Participated in field deployment and installation of data cabinets for barangay surveillance systems in Pamplona 2, Las Piñas.
- Configured and managed video wall decoder systems for centralized CCTV monitoring.
- Assisted in integrating and organizing an 84-camera live viewing setup.
- Performed troubleshooting of IP cameras, NVR systems, and network connectivity issues.
- Supported fiber patching, cable management, and equipment maintenance.
- Assisted in on-site technical support and hardware diagnostics.

PROJECTS

PETIO — IoT-Based Automatic Pet Feeder with Web Interface
Capstone Project | October 2024 – February 2026

- Designed and assembled an IoT-based automatic pet feeder using ESP8266 microcontroller. Integrated servo motors,, and output devices for feeding automation.
- Developed a web-based monitoring and control dashboard using Django Framework.
- Implemented backend logic for feeding schedules and system monitoring.
- Conducted firmware debugging, hardware troubleshooting, and integration testing.

EDUCATION

Bachelor of Science in Information Technology
Cavite State University — Bacoor Campus Branch
Expected Graduation: 2026

TVL – Electrical Installation and Maintenance
General Juan Castaneda Senior High School
2018 – 2020
